

Mirra 2[®] Chair

Mirra 2 Highly responsive and lighter than ever

Designed by Studio 7.5

Named for the way it mirrors the body's movements, Mirra 2 balances immediate comfort and personalized ergonomics in one sophisticated design that can have a professional or playful aesthetic, depending on the color palette. Designed with an "earth first" philosophy, it's an agile, high-performance chair for people who toggle between individual activities and collaborative work.

Mirra 2's Harmonic 2 tilt, with its responsive leaf-spring design, creates a smooth and balanced feel as you move from one posture to another, whatever your size or stature—from 90 to 350 pounds.

Moves naturally with you

Support for seated movement starts with a flexible, yet supportive design that allows your body to move freely and naturally. Mirra 2's Loop Spine provides torsional flex, allowing you to stretch and reach laterally, while the Harmonic™ 2 tilt provides a smooth, balanced feel as you recline. Passive PostureFit® sacral support prevents slouching and promotes proper spine alignment.

The Butterfly Back™ is made from a combination of a fabric-and-polymer backrest and a self-contouring seat material that acts like a suspension membrane. The backrest provides three levels of zoned support mapped to your body's anatomy to keep you in healthy alignment as you move. The result is an ultra-responsive chair that conforms to your shape and provides custom support for your body as it eliminates pressure points.

The polymer-only TriFlex™ back has the same self-contouring suspension seat material as the Butterfly Back and the same zones of support created by the size, shape, and pattern of the perforations. Because it doesn't have any fabric, the TriFlex back meets more rigorous cleaning protocols.

Every part of the Mirra 2 Chair was painstakingly shaped and reshaped to ensure that each molecule falls into the right place to deliver comfort and support.

Immediate comfort and personalized ergonomics

Mirra 2 moves with you, adapting to your body instantly. Personalized ergonomics come from a variety of features, starting with two back options—Butterfly and TriFlex. Both back options promote airflow so you stay cool, no matter how much you move. The FlexFront seat offers seat depth adjustability to properly support your thighs as you sit, and the AireWeave™ 2 suspension seat is temperature neutral, so heat doesn't build up as you sit.

Every molecule counts

Winner of multiple sustainability awards, Mirra 2 was the first office chair developed from the ground up with environmental responsibility in mind. Since it was introduced, we've reduced the environmental footprint further: It's 30 percent lighter and we've reassessed how every element could be more sustainably made.

Versatile and innovative CMF

A modern, inspiring color palette for textiles, back loop and spine, and base finishes offers flexibility and encourage personalization.

Design

The lean design of Mirra 2 chairs and stools brings a sophisticated profile and visual lightness to any space. An emphasis on performance is visible. The individual components and their function are apparent and celebrated, and vary accordingly in material and appearance. As performance defines the look of Mirra 2's components, their coloration allows significant options for defining the overall aesthetic of your chair or stool. Added selections for textiles, back loop and spine colors, and base finishes offer flexibility and encourage personalization.

Studio 7.5

About Studio 7.5

When Burkhard Schmitz and Carola Zwick started their design studio as a team of six in 1992, they were looking for the freedom to work on projects that interested them. And for the freedom from bosses and titles. "Everybody does everything," says Schmitz, speaking for the group that also includes Carola's brother, Roland Zwick. "That's how we cultivate ideas and maintain our openness and curiosity."

They find designing office chairs to be most rewarding and have worked with Herman Miller on the Setu Chair, the award-winning Mirra Chair, Mirra 2, Cosm, and Zeph. "We define not only how the chair looks but how it performs," Carola says. As to how these chairs perform for you, they provide comfort no matter how or where you sit.
