clyde club

About Clyde Club
Designed with classic functions in mind. The Clyde Club oozes familiarity whilst the scooped profile and stainless-steel sled base retain its unique contemporary edge. Clyde has a comfortable but formal sit, ideal for hospitality and retail environments, whilst the compact footprint rounds off its practical benefits.

Compliance
- SCS Indoor Advantage™ Gold Certificate
- naughtone is FSC® certified
- naughtone is BIF and ISO14001 certified
- Our seating is designed to meet or exceed all EN performance requirements per BS EN 16139:2013

**Clyde Club Seating Technical Specifications**

**Testing**

Our seating is designed to meet or exceed all EN performance requirements per EN16139:2013, which includes the following tests:

- Seat and back static load test
- Seat front edge static load test
- Vertical static load on back
- Foot rest and leg rest static load test
- Arm sideways static load test
- Arm downwards static load test
- Vertical upwards static load on arm rests
- Seat and back durability test
- Seat front edge durability test
- Leg forward static load test
- Leg sideways static load test
- Seat impact test
- Back impact test
- Arm impact test

**Flammability**

The cold cure foam material has been tested to meet the following standards:

- British standard 5852:2006 Part 2
- California Technical Bulletin 117-2013
- Italian standards UNI 9175-CLASS 1.M

The flammability standard of the covering fabric is dependent on the choice made by the customer, details of the flammability rating of specific fabrics can be found on supplier’s websites listed below:

Environment Attributes

- naughtone is FISP and ISO14001 certified
- naughtone is FSC® certified
- 62.3kg total weight
- 25.2% Recyclable (foam, base and fixings)
- 62.8% Reusable (plywood internal frame)
- 22.4% Recycled Content (base and fixings)
- Indoor Advantage™ Gold ANSI/BIFMA Furniture Emissions Standard (M7.1/X7.1-2011 R2016) and ANSI/BIFMA e-3-2014e (Credits 7.6.1, 7.6.2, 7.6.3)

These attributes can help you to achieve criteria towards LEED, BREEAM, Ska and WELL building certifications.

CSR Statement

naughtone has always considered the environment throughout our design and manufacturing process. We understand that as we continue to grow, so does our potential impact on our surroundings. As most of our raw materials are simple, we have great control over their sources, and are proud to be able to offer FSC® certified upholstered products and use recycled metals in our table ranges. The addition of our North American manufacturing provision also helps to keep manufacturing miles to a minimum, as our market continues to grow in the USA. Finally, naughtone offers a ‘bring back’ programme, where the client is able to return the product to our factory, where we will be happy to breakdown and recycle the parts for you.

Product Specific Design Statement

The Clyde Club is available in a range of sizes and finishes, for the purpose of this document we have a specific example from the range: Clyde Club 2 Seat Sofa with 2 arms on stainless steel sled base

The Clyde Club inner frame is constructed from hardwood then topped with CMHR foams. The sled base is made from stainless steel bar, then weld jointed together and brush polished by hand.

Where sustainable sources are quoted, and a chain of custody is required by a customer this must be indicated on the purchase order to naughtone. A chain of custody requested after an order has been placed or delivered may be difficult to recover.

Figures stated in the Environmental product summary may vary based on model and options selected, we have based this document on a specific example when produced in the United Kingdom. Recycled content calculations are taken from supplier information and industry averages, material variables are likely to affect the figures which may result in higher or lower percentages.

This document will be reviewed and updated periodically and is subject to change without notice.
Design
Every aspect of the naughtone product ranges has been designed with the environment considered, from ethical material choice and production efficacy to storage efficiency and ease of disassembly. Dense foam sets and resilient fabrics are selected for their longevity and effectiveness across sectors. Durable high quality finishes such as powder coated bases in a range of colors allow clients the freedom of finish options. Finish samples are available allowing clients to make informed decisions and retain to add to their finish libraries for future reference.

Raw Material
Local supply of raw materials is employed for the production of our products when possible, procured from suppliers that are quality inspected for extraction methods and meet the highest environmental standards.

Production
As many of our products are assembled by hand the energy expenditure wasted from machinery during the production process is kept to a minimum. All fabrics are cut to ensure optimum efficiency with fabric usage and reduced waste consumption per unit. All production sites have recycling facilities for any excess product that cannot be used elsewhere, which is then managed by a professional third party.

Distribution
Distribution of naughtone products generally occurs directly between the manufacturing site to the client. Production is localised when possible to the US or UK regions, reducing the carbon footprint and miles travelled for each product. Many items are flat packed for delivery or shipped disassembled with efficient, minimised packaging; optimizing the transportation vessel space.

Usage
naughtone products do not require energy or water to function, thus no environmental exchange takes place and no waste is generated during the life of the product.

The only foreseeable need is the cleaning of the product for general maintenance. This includes regular vacuuming to remove dirt and dust particles on upholstery items, and using a dry or damp cloth to wipe non-upholstery items.

This is recommended for all products utilised under conditions of normal wear and is expected to have negligible environmental impacts.

End of Life
Although our products are durable and demonstrate timeless design, naughtone products are manufactured in such a way that they can be easily disassembled at the end of life and most of the componentry can be either recycled or re-used as applicable.

As a company we are also happy to accept the return of products, to help re-home or recycle furniture or components at the end of the products useful life.
