Nevi™ Link

Sit-to-stand benches that create more space
for more people to work comfortably

Nevi Link

Fit more people into your office without sacrificing their comfort with Nevi Link. This sit-to-stand bench encourages regular movement and condenses your

real estate footprint through a streamlined design. It's how we're helping you create an active and efficient office and a healthy bottom line.

Enhance Employee Health

Most people are inactive for over 21 hours a day, which can lead to fatigue and health problems. Nevi Link encourages regular movement from seated to standing and back again, boosting energy levels and productivity for people.

Optimize Your Real Estate

Reduce your real estate footprint without sacrificing people's comfort with Nevi Link. More people can sit at Nevi Link, and they can do so comfortably with the sit-to-stand benches' ergonomic features.

The cable trough's interior is purposefully painted black to draw attention away from cords and blend seamlessly with the rest of the design.

An investment in Nevi Link gives you the freedom to add screens, storage, technology support, and more.

Invest in Your People

Scale Nevi Link to any application with multiple configurations and options for cable management. Nevi's efficient design means you have more to invest in the spaces and tools people need to thrive—collaborative settings with a residential vibe, multi-functional conference rooms, or more sit-to-stand desks.

About Brian Alexander

To Brian Alexander, getting a design right is more about perfecting human interaction than aesthetics. "If something is done right, it's complete with the minimum amount of bits, but at the same time, it leaves itself open to growth, like a plant." Alexander's minimalist design approach is evident in Nevi Link, a sit-to-stand bench that helps people stay comfortable as they work and empowers organizations to make efficient use of their real estate. And because of its streamlined yet flexible design, Nevi Link gives organizations the agility to add screens, storage, and technology support as people's needs evolve.
