Plex™ Lounge Furniture

For working, socializing,  
and everything in between

## **Plex Lounge Furniture**

**Designed by Sam Hecht and Kim Colin**

The most effective workplaces offer a variety of settings to support the many ways people work today. Plex Lounge Furniture is ideal for organizations that want to give people more options for working across the entire office landscape, while also keeping them comfortable and supported. Each element of this modular system can be used alone or combined in settings where people can focus on individual work, brainstorm with a group, or socialize with colleagues.

Within these settings, Plex brings the comfort of a residential environment to the workplace. Club chairs and sofas are sized to support people of all shapes and statures. The chair's sculptured back allows people to vary their postures to suit the task at hand—from having conversations to catching up on emails.

Integrated power and data ports allow people to charge and use the technology tools they bring to a setting.

## Performance

Plex features ergonomic details, including suspension seat technology and lumbar support. These design considerations make sitting a pleasure, whether a person needs to sit for a few minutes or a few hours. Work tables, fixed- or adjustable-height, nest closely with Plex seats, so people can easily adapt them to the task at hand. Power ports, available in standard outlets or in combination with USB, provide easy access for charging technology tools.

When a person requires a high degree of privacy for more focused work, Plex accommodates. The club chair's headrest forms a visual boundary that helps eliminate distractions. When the chair is equipped with a swivel base, a person can turn away from a group sitting nearby or back to them for conversations, with the chair always returning to its original position.

Combining privacy with comfort, the Plex club chair with height-adjustable headrest creates a visual boundary that helps people focus on their work. Textiles can be mixed between seat and back to create a two-tone effect or matched to create a monochromatic look.

Agile work tables, fixed- or adjustable-height, nest closely with Plex seats, so people can easily adapt them to the task at hand.

### About Sam Hecht and Kim Colin

Contrasts, and holding them in creative tension, define the work of Sam Hecht and Kim Colin. He is a native Londoner, educated as an industrial designer, contemplative, and drawn to essential simplicity. She is a Californian, trained as an architect, effusive, and comfortable using the sensibilities of her discipline to inform design. Their studio—Industrial Facility—is located in central London’s Clerkenwell neighborhood. Since founding their studio in 2002, Hecht and Colin have designed objects ranging in scale from the diminutive to the architectural, each marked by a meticulous attention to detail and thoughtful consideration of context.

Sam Hecht and Kim Colin

Plex brings purposeful variety to the workplace with a thoughtfully considered offering of colors, materials, and finishes that are as versatile and modular as the furniture.

## Design

The Plex offering is made up of just six elements—each with an identical base—that can be combined to create everything from armchairs and sofas to ottomans and benches. This base, along with the chair's compact footprint, simplifies space planning and allows for greater density in a workplace. A choice of legs, casters, and swivel bases makes Plex even more flexible, letting people change arrangements as needed. This flexibility is ideal for educational environments like student unions, libraries, and workshops.

The versatile, modular design of Plex extends to its material choices. Textiles can be mixed between seat and back to create a two-tone effect, or matched to create a monochromatic look. Plex's signature denim offering delivers a more casual aesthetic. Nearly unlimited upholstery options allow for an appearance to meet any style, durability, or cost requirement.
