Magis Chair_One Concrete Base Outdoor

Designer

Konstantin Grcic for Magis

Original Production Date

2003

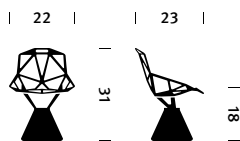

Design for the Environment

12% recycled content; 100% recyclable

Warranty

2 years

Modeled from die-cast aluminum, the seat of Konstantin Grcic's outdoor chair is constructed like a soccer ball—a collection of small flat planes assembled at angles to create a three-dimensional shape. Designed to be more open space than solid, the sculptural form provides a striking and surprisingly comfortable solution for a range of open-air settings.
